**“TEMPESTINI SYSTEMS IS ABLE TO RESPOND TO ANY REQUIREMENT,
FROM THE SINGLE SYSTEM SUPPLY
UP TO THE DEVELOPMENT OF TURN-KEY SOLUTIONS.”**

TEMPESTINI SYSTEMS: COMPANY PROFILE

Exploiting the synergies and integration abilities among the several associates of the company, Tempestini Systems is able to realize a turn-key project of qualitative level and a security guarantees demanded by the military requirements.

HISTORY

Tempestini Systems is a leader in high technology products, solutions and services, development and marketing for Communication (Broadcast, IP TV and ICT) and Security fields.

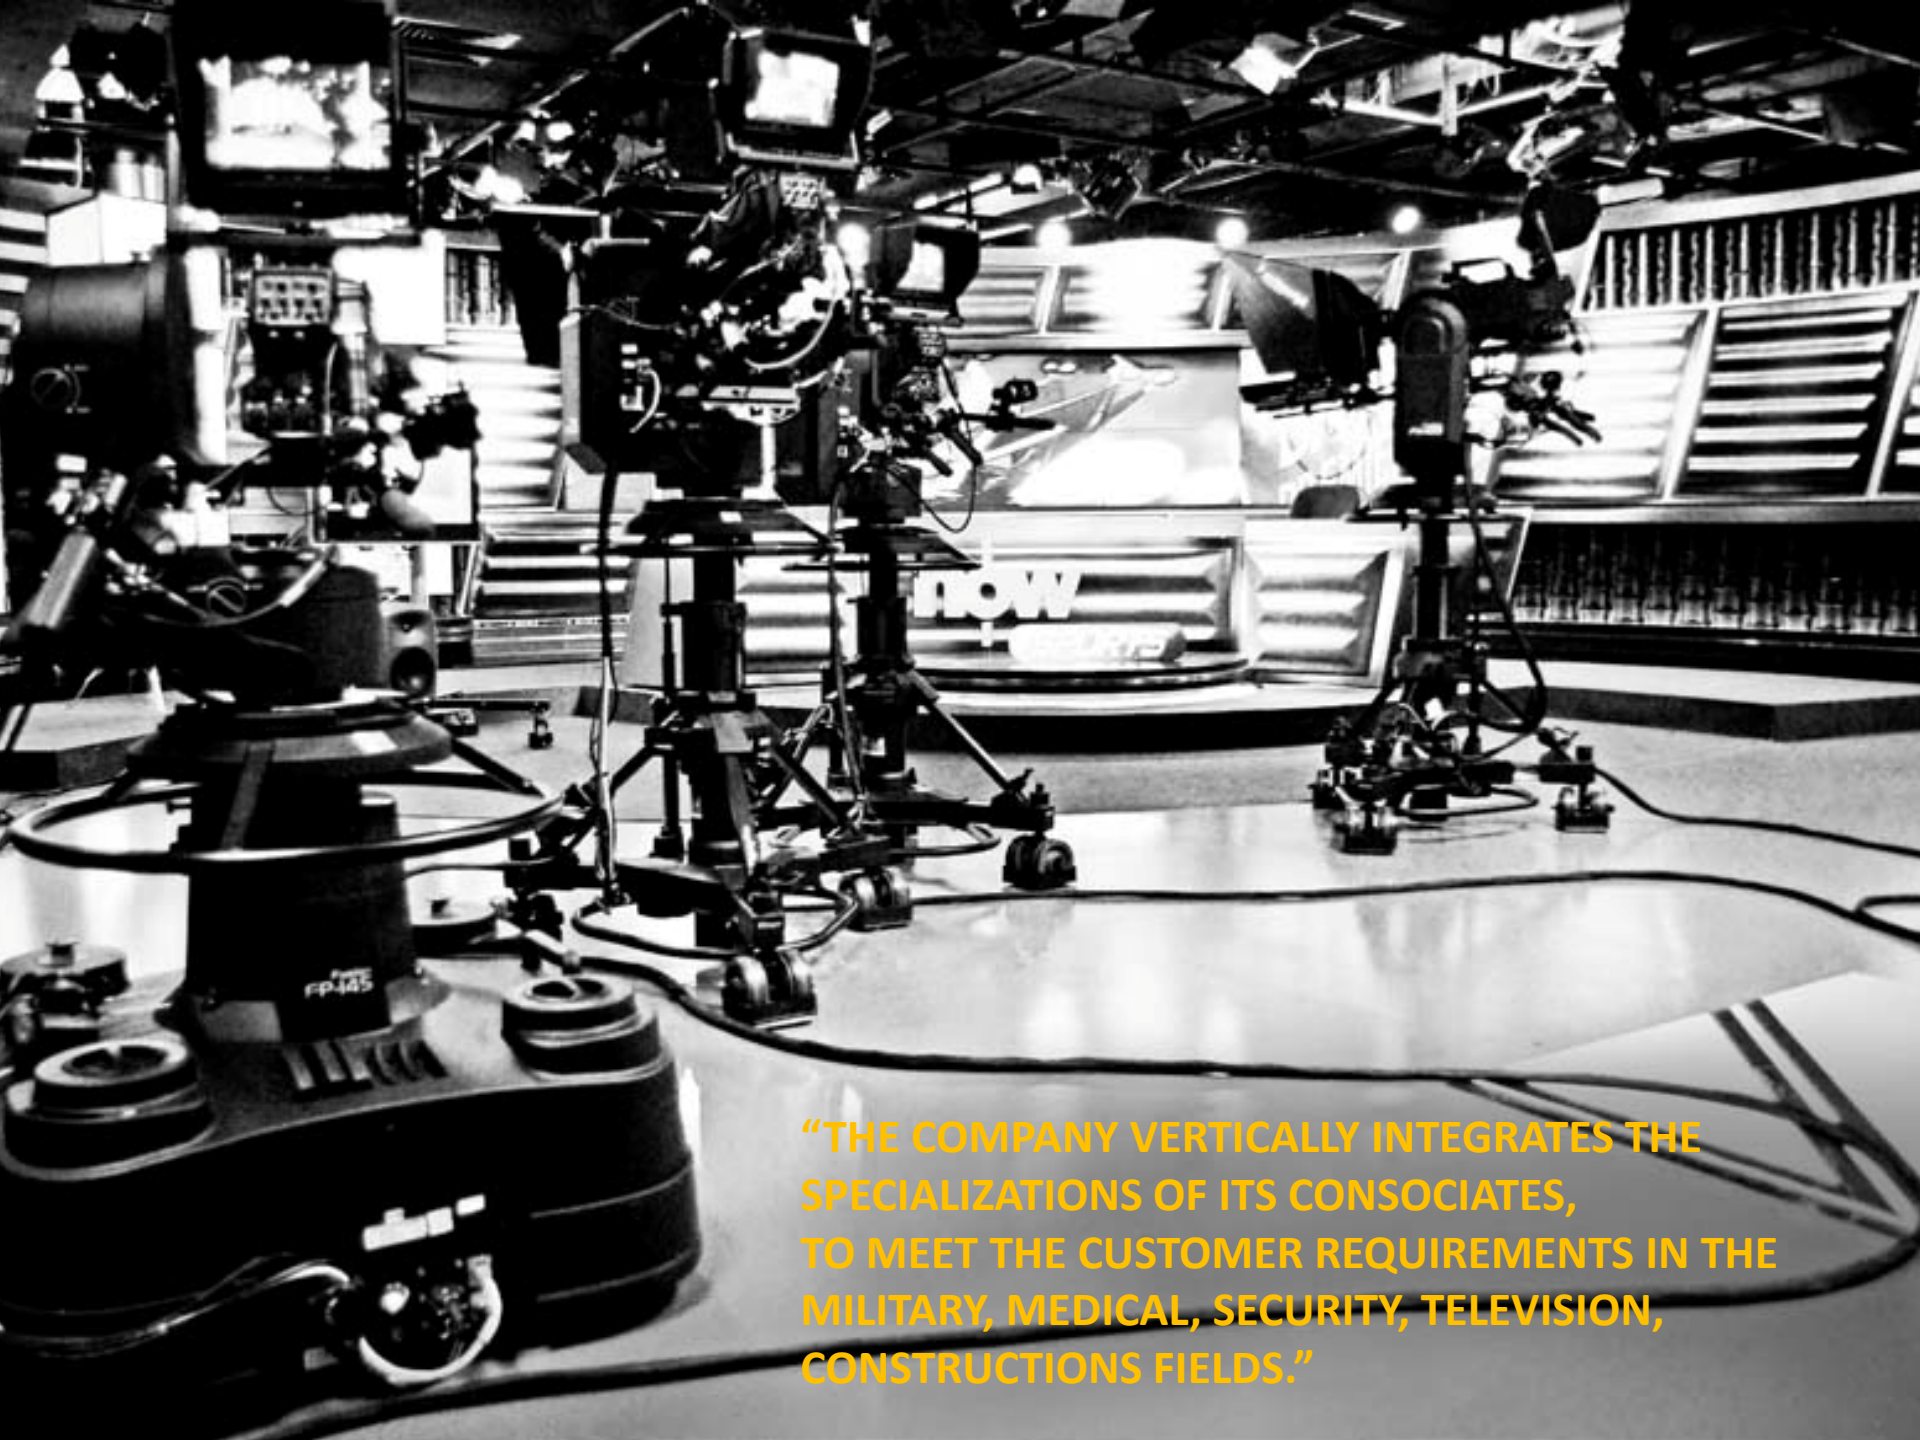

The company has been operative for thirty years and is specialized in the creation and management of complex and customized projects based on customer requirements: private companies and government organizations operating in various fields.

Tempestini Systems provides a high technology response to any customer requirement thanks to its ability in selecting the best available technologies on the market and to its highly qualified staff specialized in the various operational areas of the company.

Tempestini Systems offers integrated solutions and proposes as the unique interlocutor, simplifying the relationships with the customer and the phases of design, implementation and maintenance.

SERVICES

Tempestini Systems provides rental services, sale and assistance at multiple levels and it is able to respond to any demand, from a single system supply up to the development of a turn-key solution, by a high customization degree, in partnership with the client. Examples of turn-key projects successfully delivered, are the installation of special vehicles for the surveillance and the design and creation of constructions in which are implemented the most advanced technologies available.

“THE COMPANY VERTICALLY INTEGRATES THE SPECIALIZATIONS OF ITS CONSOCIATES, TO MEET THE CUSTOMER REQUIREMENTS IN THE MILITARY, MEDICAL, SECURITY, TELEVISION, CONSTRUCTIONS FIELDS.”

The company is independent from manufacturers; it analyzes the best technologies on the market to ensure the best value for money.

Tempestini System

- Selects the best technology
- Offers the choice among different solutions and advice to find the best one
- Integrates the chosen systems in order to give a complete service
- Customizes the integrated systems to meet the specific customer requirements

Tempestini Systems is a partner of the customer and shares the business risk. Acting in a manner which is unique for the business field overview; it provides the opportunity to experience a single system or solution even realized ad hoc before purchasing.

THE COMPANY

The company vertically integrates the specializations of its consociates for being able to offer the greatest expertise in each field and market, to adapt to the market changes and for being able to respond quickly and flexibly to the increasing diversified and targeted demands.

The company structure allows to assemble the best talent needed for the projects implementation and to use qualified partners to specific parts of the project.

Tempestini Systems is the only interlocutor for the customers in every step of the project. It is organized in operating directions and it coordinates teams specialized in various areas in which the company operates.

The company consociates provide technical services and consultancy for constructions and plants and are also committed in the design, research.
